

CloudShell Proof of Concept 'TestDrive' - for Automation of Cyber Range Deployment, Training, and Management.

TSI has partnered with Quali and other vendors to provide a bundled solution which will allow potential customers the opportunity to validate both the functionality and value of our cyber range automation solution without significant up front expenditures.

Complete Functionality

TestDrive is driven by CloudShell Orchestration Framework. Range capabilities include, but are not limited to:

- Web based self-service portal for users and administrators
- Spin up and provisioning of all range resources – both **physical and virtual**
- 100% Software Defined Infrastructure possible for security, speed, and replication
- Complete scheduling and utilization reports
- Automation of range training classes with tracking metrics
- Automation of range monitoring and management
- Range tear down and assignment of resources back to inventory
- 100% audit trail of 'ALL' range activities

TestDrive is offered as a three month subscription. Three days of training and a minimum of two days of services are required to be purchased with TSI's TestDrive.

All client licenses are concurrent user floating network licenses. The CloudShell server requires access to a SQL Server (not included – SQL Express should work for evaluation purposes).

Fraction of the Cost!

List price of the modules above is \$133,000+. We are offering the TestDrive POC for \$10,500 plus training and services (\$10,000). This \$20,500 investment allows you 3 months to prove to yourself the savings and value CloudShell automation can provide to your organization. At the end of the 3 month period we will allow you to apply 50% of your TestDrive product cost to the purchase price of a permanent license, multi-seat, single server configuration of CloudShell automation.

Let's Get Started!

Contact TSI today to get a formal proposal of the CloudShell TestDrive Bundle. The proposal will include the cost of three days of onsite CloudShell classroom training and two days of 'Jumpstart' consulting services to help get your productivity, efficiency, and savings headed in the right direction!
