TSI specializes in delivering automation tools to support almost any workflow and infrastructure through a unique offering of technologies – AgileWARE: Agile Workflow And Resource Enablement

- LaaS, PaaS, IaaS
- Any cloud – AWS, Azure, Gov, VMware, Oracle, IBM, Containers, etc.
- Any workflow – DevOps, DecSecOps, Test, Modeling, Training, Demo Portals, HPC AI/ML/DL

Strengths / Capability Highlights

TSI has developed technologies for many different markets and provides technology innovation and discovery for our customers. White papers available for the below:

- [Cyber Range as a Service®](#) - TSI CloudShell Technology
- [HPCaaS – FabreX PCIe Network Fabric](#) with orchestration and self service ([AgileWARE](#))
- [CYBRScore®](#) - Cyber Training Bundles integrated with [AgileWARE](#) (NIST/NICE framework support)
- [CyberVR™](#) - Integrated VMware Storage solution for rapid Cyber Range deployment of real production environments
- [LaaS Test Environments](#) – Complete traffic generation, layer 1 switch and test framework solution for large infrastructure lab automation for Devops and test

Teaming Desires

TSI is interested in teaming with synergistic partners for pursuing both contract and non-contract based opportunities. Our ability to automate almost any workflow and the corresponding management of the consumption of infrastructure makes TSI a winning partner for most proposals.

A sample of current engagements:

- DISA, PACOM, GDIT, Digiflight, NGC, PEO-STRI, HPC Labs, SCARS (AF), NCRC, DHS, DoJ, DMON (AF), APG
- Non-DoD interest as well – AT&T, Ribbon, Charter – Service Providers and HPC Centers
- Member of SPeC, IWRP, C5, and TRex OTAs
